

Seyong Lee

P.O. Box 2008, MS-6173
Oak Ridge, TN 37831-6173
Phone: 865-576-3869
Email: lees2@ornl.gov

Web: <https://seyonglee.github.io>

Research Interest

Parallel programming and compile-time/runtime performance optimization on emerging hardware architectures including multi-cores and hardware accelerators.
Program analysis and optimizing compiler for high-performance computing.
Internet computing /Cloud computing and sharing.

Education

8/2004 ~ 5/2011

Purdue University (West Lafayette, Indiana)
Ph.D. in Electrical and Computer Engineering (**GPA 4.0/4.0**)
Advisor: Professor Rudolf Eigenmann

8/2002~5/2004

Purdue University (West Lafayette, Indiana)
Master of Science in Electrical and Computer Engineering (**GPA 3.9/4.0**)
Advisor: Professor Rudolf Eigenmann

3/1995~2/1999

Seoul National University (Seoul, South Korea)
Bachelor of Science in Electrical Engineering (**honors**) (**GPA 3.76/4.30 (3.73/4.0)**)
Advisor: Professor Beom Hee Lee

Research Experience

Kokkos OpenACC Backend (<https://github.com/kokkos>)

- Develop the OpenACC backend of the Kokkos framework as the main architect, which is being merged into the upstream Kokkos repository.

IRIS: A Unified Framework Across Multiple Programming Platforms (<https://iris-programming.github.io>)

- Develop the high-level OpenACC/OpenMP front-end of the IRIS programming system.

OpenARC: Open Accelerator Research Compiler

(<https://csmd.ornl.gov/project/openarc-open-accelerator-research-compiler/>)

- Develop an open-sourced, high-level intermediate representation-based, extensible compiler framework, which allows full research contexts for directive-based accelerator computing.
 - o Support full features of OpenACC V1.0 (+ subset of V2.0, array reductions, and function calls).
 - o Support CUDA/OpenCL/HIP/IRIS/LLVM back ends (NVIDIA/AMD GPUs, Intel MICs, Altera FPGAs, and CPUs).
 - o Equipped with various advanced analysis/transformation passes and built-in tuning tools.

Productive GPU Programming Environment

- Evaluate existing directive-based, high-level GPU programming models to get insights on the current research issues and future directions for productive GPU programming.
- Existing directive-based GPU programming models (PGI Accelerator, HMPP, R-Stream, OpenACC, and OpenMPC) are evaluated using various benchmarks from diverse application domains.

OpenMP to GPU: Automatic translation and adaptation of OpenMP shared-memory programs onto GPUs.

- Developed the compiler system that automatically translates OpenMP-based shared-memory programs into CUDA-based GPGPU programs and optimizes their performance.
- Created a reference tuning framework, which can suggest applicable tuning configurations for a given input OpenMP program, generate CUDA code variants for each tuning configuration, and search the best optimizations for the generated CUDA program automatically.

ATune: Compiler-Driven Adaptive Execution

- Created a tuning system, which adaptively optimizes MPI applications in a distributed system.
- This project is part of a larger effort that aims at creating a global information-sharing system, where resources, such as software applications, computer platforms, and information can be shared, discovered, and adapted to local needs.

iShare: Internet-sharing middleware and collaboration

- Developed domain-specific ranking and content search mechanisms for a P2P-based Grid environment.
- Developed resource-availability-prediction mechanism for fine-grained cycle sharing system.

MaRCO: MapReduce with Communication Overlap

- Developed efficient communication overlapping mechanisms to increase the performance of Google's MapReduce system.
- Implemented the proposed overlapping mechanism in the Apache Hadoop system.

Work Experience

5/2019 ~ present

Senior R&D Staff, Programming Systems Group, Oak Ridge National Laboratory
(<https://csmd.ornl.gov/group/programming-systems>)

1/2014 ~ 4/2019

R&D Staff, Future Technology Group, Oak Ridge National Laboratory

5/2011 ~ 12/2013

R&D Associate, Future Technology Group, Oak Ridge National Laboratory

- Develop high-level programming models for future, heterogeneous computing systems.
- Develop Open Accelerator Research Compiler (OpenARC) as the main architect.

9/2009 ~ 12/2009

Software Engineer (Intern), NEEScomm, Discovery Park, Purdue University

- Developed a HUBzero-based cloud computing system for NEES (Network for Earthquake Engineering Simulation).
 - Developed web interfaces in the Joomla Content Management System to communicate with the Oracle database and NEES data repository.
 - Configured various applications such as Apache HTTP server, Mailman, SVN, and Java EE applications running on a Java Application Server (JBoss).

1/1999 ~ 7/2002

Engineer, R&D Center, Xeline Co., Ltd.

SAMSUNG & Xeline Powerline Home Automation System building project

Affiliation: Samsung Electronics and Xeline

Term : 10/2001 ~ 7/2002

- Developed Home Automation System using Xeline's PLC modems.

CISCO Systems & Xeline Powerline Network building project (CEAD)

Affiliation: Cisco Systems and Xeline

Term : 4/2001 ~ 8/2001

- Developed PCI-based Powerline Communication (PLC) card using Xeline's PLC modem chipset and AMD Ethernet MAC Controller Chipset (AM79C971).
- Built Powerline communication network with CISCO Headend Router and Customer Premise Equipment using PCI-based PLC card.

Discrete Multi-Tone (DMT) Powerline Communication MODEM Design

Term : 1/2001 ~ 7/2002

- DMT Modem development using XILINX FPGA (VERTEX, VERTEXE), TI DSP (TMS320C670), specifically designing the Digital Interface part of the modem including MII, MDIO, and DI Controller.

Multi-channel Quaternary Frequency Shift Keying (QFSK) Powerline Communication MODEM HW Design & Emulation

Term : 4/2000 ~ 12/2000

- Designed physical layer specification of Multichannel QFSK modem.
- Designed a Multi-channel QFSK modem simulator using C++ and MATLAB.
- Designed the physical layer of the modem chipset using VHDL.

- Performed overall hardware emulation using Xilinx FPGA and Analog Front End board.
- Performed Synthesis/Simulation for ASIC implementation.

Teaching Experience

Teaching Assistant of ECE 461 (Software Engineering)

Electrical and Computer Engineering, Purdue University

Term: 1/2005 ~ 5/2005

- Instructed two lab sessions and held office hours to help students.
- Conducted lab management jobs such as account managing, CVS and other utility environment setup, etc.

Professional Service

Member of the OpenACC Technical Committee and Test-Suite Committee

Member of the Kokkos Developer Group

Member of SEED Review Committee, Computer Science and Mathematics Division, Oak Ridge National Laboratory, 1/2019 ~ 3/2021

Member of Science Council, Computer Science and Mathematics Division, Oak Ridge National Laboratory, 6/2017 ~ 5/2020

Member of the NVIDIA PathForward Working Group, Exascale Computing Project PathForward Program, 2018 ~ 2020

Award Committee Member for Computer Science and Mathematics Division Awards, 2018, 2019, 2022, and 2023

Award Committee Member for 2017 IEEE CS TCHPC Award for Excellence for Early Career Researchers in High-Performance Computing, 2017

Science and Innovation Culture Metric Committee, Computing and Computational Science Directorate, Oak Ridge National Laboratory, 2016

Guest Editor for the Special Issue on “High-Performance Reconfigurable Computing” in the Journal of Algorithms, 2019

Guest Editor for the Special Issue on “Program Analysis and Optimizing Compilers for High-Performance Computing” in the Journal of Electronics, 2021

Co-Organizer for the RSDHA Workshop (RSDHA: Redefining Scalability for Diversely Heterogeneous Architectures), in conjunction with SC, 2021, 2022, and 2023

Co-Organizer for the ExHET Workshop (International Workshop on Extreme Heterogeneity Solutions), in conjunction with PPOPP, 2022, 2023, and 2024.

Co-Organizer and Panelist for the FAST AI Summit, 2022.

Organizer for Samsung Computational Memory Workshop, ORNL, 2022.

Co-Chair of the HPCAsia 2024 Programming Models and Systems Track, 2024.

Co-Chair of the HIPS Workshop (International Workshop on High-Level Parallel Programming Models and Supportive Environments), in conjunction with IPDPS, 2024.

External Ph.D. Advisory Committee, the Department of Computer and Information Science, University of Oregon, 2021

Program Committee Member

- The IEEE Transactions on Parallel and Distributed Systems (TPDS)'s special section on Innovative R&D toward the Exascale Era: 2021
- The International Conference on Parallel Architectures and Compilation Techniques (PACT) (External Review Committee): 2019 and 2020
- The International Conference for High-Performance Computing, Networking, Storage, and Analysis (SC): 2018
- SC Workshop Program Committee, the International Conference for High-Performance Computing, Networking, Storage, and Analysis (SC): 2021
- ACM International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS): 2018
- The International Symposium on Computer Architecture (ISCA): 2023
- ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming (PPoPP): 2014 and 2020 (External Review Committee)
- IEEE International Parallel & Distributed Processing Symposium (IPDPS): 2017, 2018, 2019, 2021, 2022, 2023, and 2024
- ISC High Performance: 2019, 2020, 2021 (Research Poster Committee), 2022
- International Conference on Parallel Processing (ICPP): 2013, 2020, 2021, 2022, 2023
- IEEE/ACM International Symposium on Cluster, Cloud, and Grid Computing (CCGrid): 2015, 2016, and 2017 (Posters and Research Demos track), and 2022
- IEEE International Conference on High-Performance Computing, Data, and Analytics (HiPC): 2019
- International European Conference on Parallel and Distributed Computing (Euro-Par): 2017 and 2019
- The IEEE International Conference on Parallel and Distributed Systems (ICPADS): 2013, 2014, 2015, 2016, and 2017
- IEEE International Performance Computing and Communications Conference (IPCCC): 2018, 2019, 2020, 2021, and 2022
- International Conference on Advanced Engineering Computing and Applications in Science (ADVCOMP): 2017 and 2018
- IEEE International Symposium on Parallel and Distributed Processing with Applications (ISPA): 2017, 2018, 2022, and 2023
- International Symposium on Computing and Networking (CANDAR): 2016
- IEEE International Conference on Computational Science and Engineering (CSE): 2020
- International Workshop on Programming Models, Languages, and Compilers for Manycore and Heterogeneous Architectures (PLC): 2015
- International Workshop on Representative Applications (WRAP): 2015, 2017, and 2018
- International Workshop on Accelerator Programming Using Directives (WACCPD): 2014, 2015, 2016, 2017, 2018, and 2019
- International Workshop on Accelerators and Hybrid Exascale Systems (AsHES): 2016, 2017, 2018, 2019, 2020, 2021, 2022, and 2023
- International Workshop on Legacy HPC Application Migration (LHAM): 2016, 2017, 2018, 2020, and 2021
- International Workshop on Computer Systems and Architectures (CSA): 2019
- International Workshop on High-Level Parallel Programming Models and Supportive Environments (HIPS): 2019, 2020, 2021, 2022, and 2023
- International Workshop on Legacy Software Refactoring for Performance (REFAC): 2019
- International Workshop on Languages and Compilers for a Parallel Computing (LCPC): 2019 and 2021
- FPGA for HPC Workshop: 2021
- MCHPC: Workshop on Memory-Centric High-Performance Computing: 2021 and 2022
- MTSA: Workshop on Memory Technologies Systems, and Applications: 2023

Awarded Proposals

9/2022 ~ 8/2027	Nuclear Computational Low Energy Initiative, DoE, Nuclear Physics (NP) & Advanced Scientific Computing Research (ASCR), \$13M, ASCR ORNL lead PI
8/2022 ~ 7/2027	Next-Generation Precision for Neutrino and Collider Computations, DoE, High Energy Physics (HEP) & Advanced Scientific Computing Research (ASCR), \$7M, ORNL institutional PI
9/2020 ~ 8/2025	RAPIDS2: A SciDAC Institute for Computer Science, Data, and Artificial Intelligence, DoE, SciDAC Institute for Computer Science and Data, \$5.6M, Senior Personnel
12/2019 ~ 11/2022	Brisbane: Productive Programming Systems in the Era of Extremely Heterogeneous and Ephemeral Computer Architectures, DoD, Advanced Computing Initiative (ACI), \$2.25M, Senior Personnel
7/2018 ~ 4/2021	COSMIC CASTLE, DoD, Defense Advanced Research Projects Agency (DARPA), \$6M, Senior Personnel
9/2017 ~ 8/2020	RAPIDS: a SciDAC Institute for Resource and Application Productivity through computation, Information, and Data Science, DoE, SciDAC Institute for Computer Science and Data, \$18M, Senior Personnel
10/2016 ~ 9/2019	PROTEAS: PROgramming Toolchain for Emerging Architectures and System, DoE, Exascale Computing Project (ECP), \$3.8M, Senior Personnel
10/2016 ~ 9/2018	Tahoe: Designing and Programming Exascale Memory Hierarchies, DoE, Laboratory Directed Research & Development Program, LDRD Project, \$1M, Co-Principle Investigator
4/2016 ~ 3/2017	Understanding the Interface Driven Magnetic Properties of Topological Insulators Using a GPU Accelerated First-Principles All-Electron Code, DOE, Laboratory Directed Research & Development Program, SEED Project, \$95K, Co-Principal Investigator
10/2015 ~ 9/2016	Electronic Structure Based Discovery of Hybrid Photovoltaic Materials on Next-Generation HPC Platforms, DOE, ALCF Theta Early Science Program, Tier 2 Early Science Project, Co-Principal Investigator
7/2014 ~ 6/2017	ARES: Abstract Representations for the Extreme-Scale Stack, DOE, Office of Advanced Scientific Computing Research, \$3M, Senior Personnel
10/2013 ~ 9/2016	Vancouver2: Improving Programmability of Contemporary Heterogeneous Architectures, DOE, Office of Advanced Scientific Computing Research, \$2.1M, Senior Personnel
7/2013 ~ 12/2014	Programmer-Guided Reliability and Trade-Offs with Energy and Performance, DOD, Department of Defense Advanced Computing Initiative (ACI) Fiscal Year 2012, \$1.11M, Senior Personnel

Invited and Contributed Presentations

Seyong Lee, Clacc: OpenACC Support for C/C++ in Clang, invited talk, OpenACC Users Forum, SC23, November 2023.

Seyong Lee, Directive-based, Portable Programming for Efficient Heterogeneous Computing, invited talk, *SciDAC-NP NUCLEI Annual Collaboration Meeting*, July 2023.

Seyong Lee, Portable Programming for Extremely Heterogeneous Computing, invited talk, *Electronics and Telecommunications Research Institute (ETRI)*, South Korea, June 2023.

Seyong Lee, Portable Programming for Extremely Heterogeneous Computing, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, May 2023.

Seyong Lee, OpenARC for Automatic IRIS Code Generation and Heterogeneous Computing, invited talk, *ORNL-ICL Workshop*, May 2023.

Seyong Lee, IRIS: A Portable Programming Framework for Extremely Heterogeneous Computing, invited talk, *EAST AI Summit*, December 2022.

Seyong Lee, OpenARC for Automatic IRIS Code Generation and Heterogeneous Computing, invited talk, *IRIS Mininorkshop*, November 2022.

Seyong Lee, AI for HPC: Opportunities and Applications of AI for Material Science at ORNL, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, July 2022.

Seyong Lee, IRIS: A Portable Task Runtime System for Extremely Heterogeneous Computing, invited talk, *SciDAC RAPIDS-PR Meeting*, June 2022.

Seyong Lee, Introduction to HPC Ecosystem, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, April 2022.

Seyong Lee, IRIS: Portable Programming in the Era of Extreme Heterogeneity, invited talk, *The 1st International Workshop on Extreme Heterogeneity Solutions (ExHET)*, in conjunction with PPoPP22, April 2022.

Seyong Lee, Designing an Intelligent Runtime System for Extremely Heterogeneous Computing, invited talk, *SLAM Conference on Parallel Processing for Scientific Computing (SLAMPP22)*, February 2022.

Seyong Lee, Performance Portability in the Era of Extremely Heterogeneous Computing, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, February 2022.

Seyong Lee, Introduction to HPC Software Ecosystem, invited talk, *Korean Supercomputing Conference (KSC)*, Seoul, South Korea, October 2021.

Seyong Lee, OpenARC: Extensible Compiler Framework for Directive-based, Efficient Heterogeneous Computing, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, October 2021.

Seyong Lee, Introduction to SYCL Programming, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, July 2021.

Seyong Lee, Introduction to Kokkos Programming, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, June 2021.

Seyong Lee, Introduction to OpenACC Programming, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, May 2021.

Seyong Lee, CCAMP: An Integrated Translation and Optimization Framework for OpenACC and OpenMP, invited talk, Samsung Advanced Institute of Technology (SAIT), South Korea, May 2021.

Seyong Lee, AI-based Smart Programming System for Extremely Heterogeneous Computing, invited talk, *New Horizons in Scientific Software Workshop (NHSS)*, Kyungpook National University, South Korea, April 2021.

Seyong Lee, Introduction to HPC Ecosystem, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, April 2021.

Seyong Lee, Performance Portability in the Era of Extremely Heterogeneous Computing, invited talk, *KIISE Computer System Society*, South Korea, February 2021.

Seyong Lee, Introduction to Exascale Computing Project, invited talk, *Samsung Advanced Institute of Technology (SAIT)*, South Korea, January 2021.

Seyong Lee, ETRI/ORNL Supercomputing Meeting, invited talk, *Electronics and Telecommunications Research Institute (ETRI)*, South Korea, January 2021.

Seyong Lee, Challenges and Opportunities for AI-Driven, Directive-based Heterogeneous Computing, invited talk, *Workshop on Program Synthesis for Scientific Computing (PSW)*, August 2020.

Seyong Lee and Jungwon Kim, Directive-based High-Level Porting of GR Blocks onto Heterogeneous Architectures, *Gnuradio 4.0 Workshop*, July 2020.

Honors and Awards

Best Paper Award in Proceedings of Ninth Workshop on Accelerator Programming Using Directives (WACCPD 2022, in conjunction with SC22)

Best Paper Finalist in HPEC18: IEEE High Performance Extreme Computing Conference, 2018.

IEEE-CS TCHPC Award for Excellence for Early Career Researchers in High Performance Computing

Awarded up to 3 individuals who have made outstanding, influential, and potentially long-lasting contributions in the field of high performance computing within 5 years of receiving their PhD degrees (<https://www.computer.org/web/pressroom/TCHPC-Award-2016>).

Best Student Paper Award in Proceedings of the 2010 ACM/IEEE conference on Supercomputing (SC10)

The paper on the high-level GPU programming (“OpenMP to GPGPU: A Compiler Framework for Automatic Translation and Optimization”) was selected as the most cited paper among all papers published in the Symposium on Principles and Practices of Parallel Programming (PPOPP) between 2009 and 2014 (cited 676 times as of November 2023).

The Samsung Lee Kun Hee Scholarship Foundation (2004~2008)

Awarded to 50 B.S. students, 25 M.S. students, and 25 PhD. Students in all area with focus on science and engineering area

Full-tuition and living expense for four years

IT Scholarship of Ministry of Information and Communication Republic of Korea (2002, 2003)

Awarded to 20 M.S. students and 50 PhD. students in IT area through highly competitive selection procedure

Korea Foundation for Advanced Studies (KFAS) College Student Scholarship (1997, 1998)

Awarded to 20 students in EECS through highly competitive selection procedures

Chungbuk Association College Student Scholarhip(1995~1998)

Awarded to top 5 all high school graduates in Chungbuk Province

Full-tuition for four years

Ranked 50th of all applicants at the Korea National College Entrance Exam (1994)

Ranked 50th of all applicants in South Korea (50/757,488)

Skills

Programming & Tools Experience

- GPU programming using high-level directives (PGI Accelerator, HMPP, R-Stream, OpenACC, OpenMPC, OpenMP)
- Parallel programming and performance tuning using MPI, OpenMP, CUDA, HIP, OpenCL, SYCL, Kokkos, and JAX
- Simulation and Analysis using C++ and MATLAB
- Developed a compiler system for source-to-source transformation and optimizations (OpenARC + LLVM), which is written in Java and C++.
- Optimized the performance of the Apache Hadoop MapReduce System and Distributed File System (DFS), which are written in Java.
- Programming Experience with C/C++, Java, Fortran, Python, Perl, Tcl, PHP, SQL, and shell-script languages
- Programming experience on various Unix/Linux environments such as RHEL, Debian, Ubuntu, and Solaris.
- Programming experience on RDBMS such as Oracle and MySQL
- Experience on Internet-sharing/Cloud computing middlewares, such as HUBzero and iShare.
- Experience on Content Management Systems (Joomla and Expression Engine) and Rappture Toolkit,
- Experience on Apache HTTP server, Java Application Server (JBoss), and Java EE applications
- Emulation with FPGA using ALTERA MAX+II and Xilinx Foundation
- ASIC Design and Simulation using HDL (VHDL, Verilog) and tool (Synopsys, VerilogXL)
